I have 12 x Victron 100 Ah 12.8 V lifepo4 batteries wired as 51.2v 300 ah battery bank. They have been in use for about 6 months. I have around 90 charge cycles on them. DO you think it would be OK to add 4 more batteries to existing battery bank to make it 51.2 v 400 ah?

If yes how do you suggest.

However, when energy demands rise and more gadgets are added, you may need to enlarge your battery bank to suit your requirements. Fortunately, there are various ideas and procedures you may utilize to increase the capacity of an existing battery bank. Part 1. Assessing Your Energy Needs Part 2.

I'm looking at building a 16s bank, so 16 - 3V cells in series to make 48V. I've read that adding batteries in parallel is ok for 2p or possibly 3p, but ideally not more. I understand that adding a string in parallel would be adding another 16s for a total of 32 cells. If I have my 16s setup, then.
