

Aldi solar battery charger

Overview

Does Aldi offer a solar & battery package?

The Aldi solar and battery package is being offered through a partnership between Aldi and Tempo Group, which already supplies the supermarket chain with its low-cost TVs, consumer electronics and appliances.

Does Aldi sell EV chargers?

Aldi has also waded into portable EV chargers with its “Best Buys” specials, while stocks last. With minimal detail and a one-year warranty, this \$199 temporary offer could expire faster than a heavily discounted tub of yogurt – and should be approached with the same level of apprehension.

Does Aldi have a car charger?

Aldi isn't going to replace the local auto parts store anytime soon, but the grocer is known to trot out a few car-related accessories from time to time, including storage solutions, car covers, cell phone holders, and even tire inflators. USB car chargers can be found in a lot of places, from big box stores to your local pharmacy.

Does Aldi have solar panels?

Just as supermarkets these days sell bags of crisps filled with more air than chips, the Aldi solar package looks like it would fail to satisfy the energy hunger of most Australians. A 6.08kW rooftop solar panel array is not large by 2025 standards, and Aldi's inclusion of a battery is even more of a reason for a larger solar panel array.

Does Aldi sell solar panels in Melbourne?

Aldi is shaking up the home solar market with a new, Melbourne-only offering. The multi-national, ultra-cheap retailer is now marketing a solar and battery package that includes 6kW of solar panels, a 5kW hybrid inverter and a 5.1kWh lithium ion phosphate (LiFePO4) battery, all for the princely sum of

\$7,999 – inclusive of installation.

Is Aldi shaking up the home solar market?

February 18, 2025 by Amalyah Hart [Leave a Comment](#) Aldi is shaking up the home solar market with a new, Melbourne-only offering.
