

Aps kwh for kw solar

Overview

How much does APS charge for solar energy?

This is lower than what APS charges for electricity, which is about \$0.15 per kWh. Because the RCP rate is lower than the retail rate of electricity, excess solar energy cannot fully cover the full costs of energy you take from APS in the future, lowering overall solar savings.

How do I choose a APS Solar Plan?

The APS Solar Rate Plans define Winter as November through April and Summer as May through October. Usage charges are higher in the Summer. Choosing the right plan after going solar depends on what APS Plan you had before solar and your habits of using energy in your home. For more information on this topic, see our page on APS Plans Before Solar.

Will I get an APS bill if I install solar panels?

Yes, you will still get an APS bill if you install solar panels. APS credits excess energy at a rate lower than the retail rate, which means it will not fully cover the costs of future energy usage. There many also be fees and chargers that cannot be offset by solar.

What is the difference between APs and fixed energy charge?

Many customers are on the Fixed Energy Charge Plan before going solar, which is an APS Plan that has a flat usage charge at all times. After solar, there are two plans to choose from, and they are both Time-of-Use plans. On these plans, usage charges are different depending on the time of day and day of the week.

How long does APS take to install solar?

APS requires solar homeowners to use Time of Use rates, which results in slightly lower solar savings. The solar interconnection process takes anywhere from one to four weeks with APS. Does Arizona Public Service offer net

metering?

Unfortunately, APS does not offer a net metering program.

When is APS Solar off-peak?

If they fall on a Sunday, the following Monday will be off-peak. Christmas Eve and New Year's Eve are off-peak holidays as well but only when they fall on a weekday. The APS Solar Rate Plans define Winter as November through April and Summer as May through October. Usage charges are higher in the Summer.
