

# **Australia argentina battery energy storage project**

## Overview

---

Can battery energy storage modernize Argentina's grid?

Argentina's ambitious push toward grid modernization through battery energy storage has received an enthusiastic response, with CAMMESA (Compañía Administradora del Mercado Mayorista Eléctrico) confirming the submission of 27 project proposals from 15 companies under its AlmaGBA program.

Will Argentina integrate new electricity storage infrastructure into urban distribution networks?

This national and international open call, part of Resolution SE 67/2025, marks Argentina's first large-scale effort to integrate new electricity storage infrastructure into urban distribution networks.

How many battery energy storage projects are there in Australia?

New research from Cornwall Insight Australia (CIA) projects that Australia has approximately 7 GW of battery storage projects in the pipeline. Most of that 7 GW remains in the proposal phase, but CIA sees more than 900 MW of battery energy storage at a stage of commitment or progress that will see delivery by 2024.

Why is Argentina a good stance on energy storage?

In Argentina, the stance provides a good lesson to the European stakeholders, especially in the commercial and industrial segments of energy storage. Emerging markets can present both local and foreign players by developing tenders that are investment appropriate and clear technically and financially secured.
