

Average enterprise ESS system price per 50kW in Czech

Overview

Are European energy supply chains slowing down?

Accordingly, the European local supply chains are still seeing slower progress, as FREYR is. Chinese companies remain dominant in the energy storage industry, constantly launching 300Ah+ and 500Ah+ cell products, as well as 5 MWh+ and 6 MWh+ ESS products. However, potential concerns exist amid advantages.

How will electricity prices change in Europe in Q2?

Based on current trends, prices on the DC side in Europe may average USD 140/kWh in Q2 in DDP terms, while those on the AC side average USD 180/kWh in DDP terms. Prices will likely decline by over 20% compared to the fourth quarter of 2023. The trend of upgrading to larger-capacity cells continued this year.

What's new at ESS?

With increasing cell capacity, ESS keeps transitioning to higher-capacity cells, 5 MWh+ containers, and 400 kWh+ all-in-one systems. These can also be seen this year. Additionally, some products targeting specific European applications were introduced.

How much does electricity cost in China?

A survey conducted during the event shows that prices on the DC side range from USD 85-100/kWh (prices are mostly quoted by Chinese makers in FOB terms), while prices on the AC side range from USD 160-200/kWh (some are quoted by non-China makers in DDP terms).

Does Freyr support Europe's energy-storage supply chain?

European local makers, including FREYR, are sustained in early developments, which can hardly support the region's energy-storage supply chain. Database contains the global lithium-ion battery market supply and demand analysis,

focusing on the cell segment in the ESS sector.
