

# **Average household energy storage price per 150MW in Slovakia**

## Overview

---

The electricity price structure for the end consumer in Slovakia consists of three main components: the commodity, fees associated with transmission and distribution and system fees.

The electricity price structure for the end consumer in Slovakia consists of three main components: the commodity, fees associated with transmission and distribution and system fees.

The electricity price structure for the end consumer in Slovakia consists of three main components: the commodity, fees associated with transmission and distribution and system fees. The price of electricity as a commodity is set by the market without any form of regulation, while the other charges.

Slovakia - Electricity prices: Medium size households was EUR0.18 Kilowatt-hour in December of 2024, according to the EUROSTAT. Trading Economics provides the current actual value, an historical data chart and related indicators for Slovakia - Electricity prices: Medium size households - last.

On average, household electricity prices in Bratislava are in line with the European Union average, but may be higher or lower depending on the specific tariffs offered by individual suppliers. The Slovak government regulates the prices charged by electricity companies and sets limits on the amount.

Our data shows three main groups care about Bratislava's energy storage pricing: In 2023, lithium-ion battery costs in Slovakia dropped by 14% year-over-year – but wait, there's a twist. Supply chain hiccups from Asian manufacturers caused a 6% price spike last quarter. Confused?

You're not alone. How much does electricity cost in Slovakia?

Meanwhile, the average price of electricity without taxes in Slovakia in that period was € 0.123 per kilowatt hour, €6.96% less than in the previous period, in which the price of electricity without taxes was €0.1322kWh. In the last twelve months the price of electricity in Slovakia has fallen by 6.46%.

What was Slovakia - electricity prices - medium size households in December 2023?

Slovakia - Electricity prices: Medium size households was EUR0.19 Kilowatt-hour in December of 2023, according to the EUROSTAT. Trading Economics provides the current actual value, an historical data chart and related indicators for Slovakia - Electricity prices: Medium size households - last updated from the EUROSTAT on September of 2024.

How much energy does Slovakia use?

Primary energy use in Slovakia was 194 TWh and 36 TWh per million inhabitants in 2009. Slovakia has a plan to get renewable sources of energy up to 19.2% by 2030. From 2024, following the completion of two new nuclear reactors, Slovakia will return to being a net exporter of electricity. Slovnaft is the largest oil refinery in Slovakia.

How long will a gas storage facility last in Slovakia?

Its construction should last about one year. The current underground gas storage capacity in Slovakia is about 3 billion cubic metres. The existing facilities are operated by companies Nafta and Pozagas. Another locality suitable for construction of a gas storage facility is in Ptrukša in eastern Slovakia.
