

Average hybrid renewable storage price per 800MW in Czech

Overview

Why are Czech businesses investing in renewable projects without subsidies?

The subsidy increases to cover up to 75% of costs for community projects. But what we noticed at Wattstor is that Czech businesses are investing in renewable projects even in the absence of subsidies, because they have realised the strong business case for generating clean energy on site.

How has the energy crisis impacted the Czech Republic?

With coal dominating the energy mix, the Czech Republic has traditionally enjoyed low electricity prices and a steady supply of domestic fuel. However, the recent energy crisis, together with pressure from stakeholders and regulatory bodies to decarbonise, has triggered an unprecedented shift in the country's energy market.

What is the Czech energy fund?

There are several programmes designed under this scheme in the Czech Republic to support areas such as the modernisation of heating sector, transport modernisation, energy efficiency as well as the development of new renewable energy sources projects, for which about 40% of the whole Czech part of the fund is anticipated to be assigned to.

What are the new Res regulations in the Czech Republic?

In 2023, law amendment to the Czech Energy Act and the Czech Construction Act became effective (nicknamed Lex RES I.), bringing set of changes to the RES permitting procedures in the Czech Republic. These include: No electricity generation licence is required for sources up to 50 kW.

Will 534 GW reduce energy costs in emerging countries?

The addition of 534 GW in emerging economies at costs lower than fossil fuels will reduce electricity generation costs by up to USD 32 billion this year. New solar and wind projects are increasingly undercutting even the cheapest and

least sustainable of existing coal-fired power plants.

Can Koda auto buy green energy from a wind farm?

Under the quasi-corporate PPA scheme, provider of energy supplies for car manufacturer Škoda Auto, contracted the purchase of green energy from a wind farm in Moravian-Silesian region. There is a potential for growth of the corporate PPAs sector. The legal framework for entering into bankable PPAs with longer-term power price fixing is available.
