For a 50MW/50MWh system (assuming a 1-hour discharge duration), the battery cost alone could be between \$5 million and \$15 million.

The average price of lithium-ion battery packs dropped by 20% in 2024 compared to the previous year. This drop is attributed to the abundance of raw materials and intense market competition. These global cost reductions may translate into lower prices for imported solar storage systems in Iraq.

In Iraq, the price of solar battery systems is influenced by multiple factors, including system capacity (for both residential and commercial storage), battery chemistry, inverter compatibility, installation services, transportation costs, and applicable tax policies. To meet the specific needs of
