

Average modular ESS container price per 10kWh in India

Overview

Currently, the cost of battery-based energy storage in India is INR 10.18/kWh, as discovered in a SECI auction for 500 MW/1000 MWh BESS. The government has launched viability gap funding and Production-Linked Incentive (PLI) schemes to make battery storage affordable. How much does an ESS system cost?

Increased competition in the commercial ESS space Government incentives (e.g., tax credits in the U.S. and Europe) make systems more affordable. For example, in 2022, a 100 kWh system could cost \$45,000. By 2025, similar systems could sell for less than \$30,000, depending on configuration.

What is standalone ESS?

As the country rapidly scales up variable renewable energy (VRE), Standalone ESS offers a dispatchable solution to address the intermittency of renewables, support grid stability, and optimise energy usage.

How much does a 100 kWh solar system cost?

For example, in 2022, a 100 kWh system could cost \$45,000. By 2025, similar systems could sell for less than \$30,000, depending on configuration. Why invest now?

.

What are the challenges facing the ESS industry?

The Standalone ESS industry continues to face persistent challenges such as project cancellations, supply-chain constraints, weak domestic manufacturing and power purchase agreement delays. Players such as IndiGrid and HG Infra Engineering are focused on Battery + ESS (BESS).

Average modular ESS container price per 10kWh in India

[SECI allocates 2 GW solar, storage at average price ...](#)

Solar Energy Corp of India (SECI) has concluded its tender for 2 GW of solar with 1 GW/4 GWh of storage capacity at a final average price of INR 3.52 (\$0.041)/kWh.
