

# **Average modular ESS container price per 3MW in Israel**

## Overview

---

What is a battery energy storage system (BESS) container?

Battery Energy Storage System (BESS) container is a specialized, modular unit designed to house and operate large-scale battery storage systems. These containers are typically used in applications ranging from grid energy storage and renewable energy integration to backup power and commercial solar Storage Batteries.

How much does an ESS system cost?

Increased competition in the commercial ESS space Government incentives (e.g., tax credits in the U.S. and Europe) make systems more affordable. For example, in 2022, a 100 kWh system could cost \$45,000. By 2025, similar systems could sell for less than \$30,000, depending on configuration.

How much does a battery cost in Israel?

Israel's storage tender sets prices between \$0.0056 and \$0.0085 per kW, with kWh figures therefore at \$49.41 to \$74.20 per kWh. Israel has awarded contracts for 1.5 GW of high-voltage battery storage capacity across three regions, marking a significant milestone in the country's energy transition.

How much storage capacity will allied infrastructure have in Israel?

These projects will have a total storage capacity of 1,300 MWh, potentially increasing to 1,900 MWh after entering the deregulated market. Ormat Technologies, in partnership with Allied Infrastructure, also announced it won tolling agreements for 300 MW/1,200 MWh of storage, marking its entry into Israel's large-scale energy storage sector.

How much does a MWh system cost?

MWh (Megawatt-hour) is a measure of energy capacity (how long the system can continue delivering that power output). For example, a 1 MW / 4 MWh BESS has four hours of storage capacity. So, while the system might be

\$200,000 per MW, the effective cost can be \$800,000 per MWh if it has four hours duration.

How many MW of electricity will be built in Israel?

Northern Israel: Bi-Liht, Noy Agira, Allied, and Ormat will develop four facilities totaling 520 MW at an average tariff of 2.0 agorot per kW. Arava: Enlight and EDF will establish three projects with a combined capacity of 420 MW at a 3.0 agorot/kW tariff.

## Average modular ESS container price per 3MW in Israel
