

Average off grid battery system price per 5MW in Indonesia

Overview

How much energy does an off-grid Solar System use in Indonesia?

In Indonesia, this translates to roughly 4.2 kWh of energy per kW installed. In an off-grid solar system, storage batteries are required to allow you to access solar energy for an entire day. You can also add on a smart control system to allow you to monitor and control your electricity consumption and prolong your battery life.

Can you use an off-grid solar system in Bali?

Using an off-grid solar system is a little more complex than that. Remember, solar panels need direct sunlight to produce energy! In Bali, Lombok, and many parts of Indonesia, this translates to an average of 4.2 kWh (kilowatt-hour) per kW of solar installed. When there is cloud cover or rain, your power output will drop.

How much electricity can be produced by PV-battery-systems in Indonesia?

The total annual net amount of electricity which can be produced by PV-battery-systems in Indonesia is 403 GWh, of which 339 GWh is cost-effective. The total amount can be produced by a total of 389 MW p of PV and 6.0 GWh battery capacity.

How much does it cost to electrify rural areas in Indonesia?

To electrify all rural areas in Indonesia by the combination of the proposed hybrid PV micro-grids and stand-alone PV systems, the total cost over 25 years is estimated to be roughly 13 billion USD. On average the LCOE for hybrid PV is 0.38 USD/kWh, for the stand-alone PV system this is 0.76 USD/kWh.

How much does a solar power plant cost in Indonesia?

installed in Indonesia with capital cost ranges from 1400 - 2000 USD/kW. This is close to the average investment cost in Europe, but higher compared to the

average cost in North and South America, Africa (up to 1300 USD/kW) and China and India (around 1100 USD/ kW).

What is Indonesia's off-grid PV potential?

Another study estimates the theoretical off-grid PV potential for Indonesia to be 1300 MW p , based on 50% of the population without access to electricity in 2005.
