

# **Average photovoltaic ESS price per 20MW in Italy**

## Overview

---

How much does a solar PV system cost in Italy?

The price of roof-mounted residential photovoltaic (PV) systems in Italy decreased from 3.6 euros per watt in 2011 to 1.45 euros per watt in 2023. A similar trend can be observed in the prices of commercial and industrial PV systems and ground-mounted plants. The growth of the solar PV sector in Italy made the market more competitive.

How much does a crystalline silicon photovoltaic module cost in Italy?

The average price of crystalline silicon photovoltaic (PV) modules in Italy decreased steadily from over two euros per watt before 2010 to a minimum of 0.29 euros per watt in 2019. Prices have been increasing since that year and amounted to 0.45 euros per watt in 2022. Get notified via email when this statistic is updated.

How much does a roof-mounted photovoltaic system cost in Italy?

Costs associated with hardware were the most significant ones when it comes to roof-mounted residential photovoltaic systems in Italy. According to data, among the hardware costs, the largest share was attributable to modules, whose cost amounted to 0.37 euros per watt on average in 2023.

What is the market share of solar energy in Italy?

The solar rooftop segment continues to dominate the Italian solar energy market, holding approximately 63% market share in 2024. This significant market position is driven by several factors, including the country's robust residential and commercial adoption of solar PV systems.

How much does electricity cost in Italy?

Electricity prices for residential consumers in Italy reached EUR 0.319 per kilowatt-hour in the second half of 2022, representing one of the highest rates in Europe. This price surge has accelerated the adoption of solar energy

solutions across residential, commercial, and industrial sectors.

Which region has the most solar PV installed capacity in Italy?

Lombardy was the region with the greatest share of PV installed capacity nationwide, followed by Veneto. The share of renewable electricity produced from solar PV facilities in Italy increased by almost 10 percentage points between 2018 and 2023.
