

Average photovoltaic ESS price per 8MW in Germany

Overview

The average residential PV-ESS installation cost in Germany exceeds €18,000 (\$19,500), requiring households to commit significant savings or secure loans. While government subsidies exist, complex application processes and delayed payouts deter price-sensitive customers. Are solar photovoltaics a good investment in Germany?

Solar photovoltaic systems could be a significant contributor, though their success also relies on long-term weather conditions. Discover all statistics and data on Solar photovoltaics in Germany now on [statista.com](https://www.statista.com)!

How much does a rooftop PV system cost in Germany?

From pv magazine Germany The average system price for rooftop PV systems in German single-family homes with and without battery storage rose by around 10% to €1,557 (\$1,711)/kW in the second quarter of 2023, in comparison with the first quarter of the year. The prices are 21.9% higher than the second quarter of 2022 when they stood at €1,277/kW.

Does Germany have a grid-parity for photovoltaic & energy-storage?

In 2018, photovoltaic (PV) and energy-storage for households reached grid-parity: storing PV energy with batteries became cheaper than the price from the public power network. However, the majority of PV systems in Germany are not yet connected to batteries - in 2018 only 8% were equipped accordingly.

What percentage of electricity is generated by photovoltaics in Germany?

With an electricity generation of 72.6 TWh in 2024, photovoltaics covered nearly 14 per-cent of gross electricity consumption [AGEE] in Germany (Figure 3). All renewable energies (RE) together came to 53 percent. Figure 3: Development of the share of renewable energies in gross electricity consumption in Germany [ISE4], Status 12.03.2025 [AGEE].

What data is gathered in the German PV price monitoring?

The data stems from interviews with solar installation companies and an evaluation of offers made to end consumers on online portals. The following data is gathered in the German PV Price Monitoring: Split of turn key costs of < 30 kWp rooftop systems in different cost components.

What is Europe's leading PV market?

Germany is Europe's leading PV market. It converts more solar energy into electricity than any other country. Grid parity was achieved in Germany in 2011 with levelized cost of energy (LCOE) of newly installed systems below retail electricity.

Average photovoltaic ESS price per 8MW in Germany
