

Average renewable energy storage price per 2MW in France

Overview

The tool displays the capture price received by wind and solar power assets using hourly production and monthly average price data for Spain, Germany, Italy, France, and the United Kingdom.

The tool displays the capture price received by wind and solar power assets using hourly production and monthly average price data for Spain, Germany, Italy, France, and the United Kingdom.

Platts has launched an “interactive explorer” tool that shows the capture price received by wind and solar power assets, using hourly production and monthly average price data for Spain, Germany, Italy, France, and the United Kingdom. Image: Maxim Grama y Andreas Franke, S&P Global Commodity.

Recent industry analysis reveals that lithium-ion battery storage systems now average €300-400 per kilowatt-hour installed, with projections indicating a further 40% cost reduction by 2030. For utility operators and project developers, these economics reshape the fundamental calculations of grid.

Small-scale lithium-ion residential battery systems in the German market suggest that between 2014 and 2020, battery energy storage systems (BESS) prices fell by 71%, to USD 776/kWh. With their rapid cost declines, the role of BESS for stationary and transport applications is gaining prominence.

As per MRFR analysis, the France Energy Storage Market Size was estimated at 394.68 (USD Million) in 2023. The France Energy Storage Market is expected to grow from 436.59 (USD Million) in 2024 to 1,748.3 (USD Million) by 2035. The France Energy Storage Market CAGR (growth rate) is expected to be.

As of 2025, the France Energy Storage Systems Market is valued at a significant scale, with projections to reach USD 22,251 million by 2035, growing at a CAGR of 9.33% from 2025 onward. The battery energy storage systems (BESS) segment, in particular, is thriving, bolstered by technological.

Wholesale electricity prices are average day-ahead spot prices per MWh sold per time period, sourced from ENTSO-E, Low Carbon Contracts and semopx.

Prices have been converted from £/MWh to €/MWh for the UK. These are the prices paid to electricity generators, and are not the same as retail.
