

Average residential solar battery price per 500kW in Australia

Overview

As of 2025, the installed price of a solar battery in Australia generally ranges from \$900 to \$2,000 per kilowatt-hour (kWh), depending on the brand, battery chemistry, and installation complexity. Most home batteries fall between \$8,000 and \$15,000 installed.

As of 2025, the installed price of a solar battery in Australia generally ranges from \$900 to \$2,000 per kilowatt-hour (kWh), depending on the brand, battery chemistry, and installation complexity. Most home batteries fall between \$8,000 and \$15,000 installed.

The table below displays average, indicative battery installation prices from a range of installers around Australia, most of whom are active in the Solar Choice network. Prices include installation, GST and the federal battery rebate. *Includes the installation of the battery only. You must.

Buyer #1 pays around \$28,500 for 10 kW solar system with a 13.8kWh battery. Plug a new battery into your existing inverter — no extra inverter cost. Installation is quicker and cheaper (no inverter swapping). Still eligible for federal and state/territory rebates. Buyer #2 pays around \$15,500 in.

In 2025, the solar battery cost for Australian households starts from \$4,500, with larger systems exceeding \$12,000. This variation depends on battery size, brand, and whether it's installed alongside solar panels or retrofitted into an existing system. There are two key rebates that can help.

As of May 2025, the average price of solar batteries in Australia ranges from \$900 to \$2,000 per kilowatt-hour (kWh) of storage. A 10kWh system typically costs a little over \$10,000, while a larger 16kWh system may approach \$16,000, depending on the brand, performance, and installation factors.

The cost of a solar battery depends on its capacity, brand, and installation complexity. Here's an overview: Budget Models: \$5,000–\$7,000 (lower capacity, basic functionality). Mid-Range Models: \$8,000–\$12,000 (ideal for average households). Premium Models: \$12,000–\$17,000 (larger capacity).

The average solar battery price (installed) in Australia in 2025 is sitting between \$800 and \$1,200 per kWh. That means for a standard 10kWh system, you'll typically pay between \$8,000 and \$12,000 installed. Here it is important to note that the prices may vary based on your location, installer. How much do solar batteries cost in Australia?

As of May 2025, the average price of solar batteries in Australia ranges from \$900 to \$2,000 per kilowatt-hour (kWh) of storage. A 10kWh system typically costs a little over \$10,000, while a larger 16kWh system may approach \$16,000, depending on the brand, performance, and installation factors. Here's a breakdown of average prices.

How much does a 10 kWh solar battery cost in Australia?

The average price for a 10 kWh solar battery ranges between \$8,000 - \$10,000. While the uptake of solar panels in Australia is really strong, the same cannot be said for solar batteries. A newer technology, battery storage has been viewed as expensive - especially when comparing the payback of a battery system against its expected life.

How much does a solar battery cost?

Thanks to falling prices and the federal battery rebate, thousands of households can now expect payback within the warranty period, particularly if they use a lot of power at night or join a Virtual Power Plant. In summary:
Price Range: Popular solar batteries have an installed cost between \$8,000 and \$13,000 including the federal rebate.

Are solar batteries a good investment in Australia?

Solar energy adoption in Australia has grown significantly in recent years. With an increasing focus on sustainability, solar batteries have become a crucial component for homeowners and businesses seeking to maximise their renewable energy use.

How long do solar batteries last in Australia?

Lifespan and Warranty: Solar batteries typically last between 5 and 15 years, with warranties covering a portion of this time. Popular solar battery brands in Australia, such as Tesla, LG Chem, and Sonnen, offer a range of products to suit different needs. Each brand provides detailed specifications, ensuring consumers can make informed decisions.

Are batteries worth it in Australia?

We've been tracking the financial return of batteries in Australia for over a decade and regularly update our analysis of whether batteries are worth it. At the midway point of 2025 was a key turning point in this equation as the federal battery rebate was introduced which offers a discount of around 30% for a typical 10kWh battery.
