

# **Average rooftop solar battery price per 50kW in Greece**

## Overview

---

The average cost of a solar system in Greece is €3 per watt. To account for the typical energy usage of the average home in Greece, most homeowners require a 4.2-kilowatt system.

The average cost of a solar system in Greece is €3 per watt. To account for the typical energy usage of the average home in Greece, most homeowners require a 4.2-kilowatt system.

The average cost of a solar system in Greece is €3 per watt. To account for the typical energy usage of the average home in Greece, most homeowners require a 4.2-kilowatt system. Using the per-watt figure above, a solar installation costs about €8,600, or €6,450 after the federal solar tax credit.

Subsidies for households range from 45% to 75% of the total cost depending on their income, while for farmers they are 40% to 60%. It means the program covers EUR 10,000 to EUR 16,000 for a rooftop PV combined with a battery. Moreover, there is a 10% bonus for people with disabilities, as well as.

The price of such a system is close to 11,500 euros, of which the order subsidy will cover 4,600 euros at an average support rate (50%). Experts say that such a system will pay off in 7.8 years, and for the remaining 17.2 years, out of the 25 years stipulated by the contract, the profit will be.

November 2023, Greece submitted its NECP with more ambitious and updated targets for renewables and solar: 23.5 GW for all forms of renewables, from which 13.4 GW came from solar power capacity. However, there is no roadmap or strategy at this time in regards to rooftop solar PV in particular.

for low power systems , with a very high tariff (0.55 Euros/kWh) for up to

10kWp rooftop PV. As this price was deemed not viable, it was reduced from 2013 and forward and led to reduced investment interest for the Fit scheme since 2013, and zero after 2014, when the net metering scheme was. How much does a solar system cost in Greece?

The average cost of a solar system in Greece is €3 per watt. To account for the typical energy usage of the average home in Greece, most homeowners require a 4.2-kilowatt system. Using the per-watt figure above, a solar installation costs about €8,600, or €6,450 after the federal solar tax credit of 25% is applied.

How much will a rooftop photovoltaic subsidy program cost Greece?

Two more rooftop PV subsidy programs are expected, one for businesses and one for industries, with total funds for the sector expected to surpass EUR 700 million and potentially reach EUR 1 billion. The Greek Ministry of Environment and Energy issued a public call for its EUR 238 million subsidy program for rooftop photovoltaics.

Does Greece have a plan for rooftop solar PV?

November 2023, Greece submitted its NECP with more ambitious and updated targets for renewables and solar: 23.5 GW for all forms of renewables, from which 13.4 GW came from solar power capacity. However, there is no roadmap or strategy at this time in regards to rooftop solar PV in particular.

How much does the government subsidize rooftop photovoltaics?

In addition to subsidizing rooftop photovoltaics, the government has also enacted a EUR 100 million program for 120,000 solar thermal rooftop systems, with a subsidy level of 60% and a maximum support level of EUR 900 per household.

How much can a 3 kW photovoltaic system save?

The maximum installed capacity for the PV system is 10.8 kW compared to 10.8 kWh for the battery. According to calculations based on the program, a small 3 kW photovoltaic system costing EUR 11,500 can bring the household savings of EUR 22,000 within its 25-year lifetime.

How much solar capacity will Greece have in 2022?

In 2022, 1.4 GW of new PV projects were connected to the grid, bringing the

cumulative capacity to 5.5 GW. This was the best performance ever for the Greek solar sector. Still, it looks modest if you compare it with the expected performance of the market in 2023 which should bring online around 1.7 GW of solar capacity.

## Average rooftop solar battery price per 50kW in Greece
