

Average rooftop solar storage price per 30kWh in Serbia

Overview

How many people can afford to invest in solar power in Serbia?

In Serbia, however, says energy efficiency expert Slobodan Jerotic, the question is really how many households can afford to invest €5,000–6,000 in solar power systems. "We are talking at best about 10,000 families, and that would be around 30 megawatts in total, which is not a huge amount," he says.

Who are the 'prosumers' of solar energy in Serbia?

Her four-person household is one of the first "prosumers" of solar photovoltaic (PV) energy in the country. Prosumers are households that produce and consume electricity from their own solar plants, even if these plants are made up of just a few panels. In Serbia, home-generated energy in excess of a household's needs is sent to the grid.

Does Serbia have a prosumer model?

In Serbia, the prosumer model only became feasible for private households this year. And with changes to the Use of Renewable Energy Sources Law, the state finally created a system that was ostensibly designed to motivate citizens to try their luck with solar power. But the system was flawed.

What is a 'prosumer' of solar photovoltaic (PV) energy?

These solar panels contain solar cells that generate electric power. Her four-person household is one of the first "prosumers" of solar photovoltaic (PV) energy in the country. Prosumers are households that produce and consume electricity from their own solar plants, even if these plants are made up of just a few panels.
