We combine high energy density batteries, power conversion and control systems in an upgraded shipping container package. Lithium batteries are EVE brand, whose LFP chemistry packs 215kWh of energy into a battery volume weighing 3100kg. Our design incorporates safety protection mechanisms to endure.

We evaluate your home or business's energy usage and utility rate to determine potential solar savings. With the initial evaluation we're able to determine payoff period and ROI. The solar systems we install typically have a payback between 4-7 years and a 18-20% return each year. We design every.

However, prices aren't always simple—they vary depending on size, materials, certifications, and location. Let's break down what really goes into the cost

and whether it's worth your money. The final cost of a solar container system is more than putting panels in a box. This is what you're really.
