

# **Average solar with battery price per 30kW in Australia**

## Overview

---

As of May 2025, the average price of solar batteries in Australia ranges from \$900 to \$2,000 per kilowatt-hour (kWh) of storage. A 10kWh system typically costs a little over \$10,000, while a larger 16kWh system may approach \$16,000, depending on the brand, performance, and.

As of May 2025, the average price of solar batteries in Australia ranges from \$900 to \$2,000 per kilowatt-hour (kWh) of storage. A 10kWh system typically costs a little over \$10,000, while a larger 16kWh system may approach \$16,000, depending on the brand, performance, and.

The table below displays average, indicative battery installation prices from a range of installers around Australia, most of whom are active in the Solar Choice network. Prices include installation, GST and the federal battery rebate. \*Includes the installation of the battery only. You must.

The average Australian household uses around 15 to 30 kWh of electricity per day, which adds up to approximately 450–900 kWh per month, depending on location and lifestyle. According to the Australian Energy Regulator (AER), these numbers vary slightly by state, but a 30kWh solar battery is often.

The price you'll pay for a battery with the rebate depends on whether you are: In this guide, I break down the real costs, explain which rebates are available and how they affect your payback. Typical installed prices for popular solar batteries in Australia: \*These prices don't include a hybrid.

The average solar battery price (installed) in Australia in 2025 is sitting between \$800 and \$1,200 per kWh. That means for a standard 10kWh system, you'll typically pay between \$8,000 and \$12,000 installed. Here it is important to note that the prices may vary based on your location, installer.

All figures below already include the Cheaper Home Batteries Program rebate, assuming the installer assigns the STCs at the current clearing-house price. Actual quotes can vary with brand, installation complexity and location, but these ranges reflect mid-tier equipment installed by accredited.

The average price for a 10 kWh solar battery ranges between \$8,000 - \$10,000. While the uptake of solar panels in Australia is really strong, the same cannot be said for solar batteries. A newer technology, battery storage has been viewed as expensive - especially when comparing the payback of a. How much does a solar battery cost in Australia?

A guide to solar battery prices and value. Solar battery prices have come down significantly with the introduction of the federal government rebate. The average price for a 10 kWh solar battery ranges between \$8,000 - \$10,000. While the uptake of solar panels in Australia is really strong, the same cannot be said for solar batteries.

How much does a 30kWh solar battery cost in Australia?

Installing a 30KWh solar battery involves a significant upfront investment, but rebates and incentives can help bring the cost down. In Australia, the approximate cost of 30KWh systems from the Sungrow SBH Series is AU\$21,448. Final cost depends on:.

How much does a solar battery cost?

Thanks to falling prices and the federal battery rebate, thousands of households can now expect payback within the warranty period, particularly if they use a lot of power at night or join a Virtual Power Plant. In summary: Price Range: Popular solar batteries have an installed cost between \$8,000 and \$13,000 including the federal rebate.

Are solar panels a good investment in Australia?

These savings figures are for new panel and battery systems: Throughout Australia, average payback times on solar panel and battery systems range from 6.2 years to 10.1 years. The economics are far more attractive in some states like South Australia, Queensland and Western Australia.

Are batteries worth it in Australia?

We've been tracking the financial return of batteries in Australia for over a decade and regularly update our analysis of whether batteries are worth it. At the midway point of 2025 was a key turning point in this equation as the federal battery rebate was introduced which offers a discount of around 30% for a typical 10kWh battery.

How much does a 6 kWh solar system cost?

Brands like Sungrow, Alpha ESS, and Soltaro offer solid 6-8kWh options starting around \$4,000-\$5,000 before rebates. Can I add a battery to my current solar system?

## Average solar with battery price per 30kW in Australia
