

# BESS tender price in Malaysia 2030

## Overview

---

Under the Aurora Central scenario, price spreads in Peninsular Malaysia are expected to remain relatively narrow through 2030 but expand substantially thereafter.

Under the Aurora Central scenario, price spreads in Peninsular Malaysia are expected to remain relatively narrow through 2030 but expand substantially thereafter.

In response, the Energy Commission (Suruhanjaya Tenaga, ST) has taken a proactive step, launching a 400 MW/1,600 MWh Battery Energy Storage System (BESS) programme, with the Request for Quotation (RFQ) released on 29 November 2024. The programme calls for four separate BESS projects, each with a

Bloomberg New Energy Finance (BloombergNEF) projects that the market will expand from 27GW (or 56GWh) in 2021 to 411GW (or 1,194GWh) by 2030. The US and China are expected to dominate the market, accounting for 54% of global installations by 2030. The residential and commercial sectors will

Furthermore, peak energy demand in Malaysia is expected to rise on average by 1.6 % annually till 2030, increasing grid system costs from RM 28.79 billion (2021) to RM 41.96 billion (2030), which will likely be passed on to the consumer, resulting in higher energy prices. To address these issues.

Solarvest Holdings Bhd (KL: SLVEST) group CEO Davis Chong estimates the installation cost of BESS to be around US\$200 per kilowatt-hour (kWh), translating to about RM400 million for the 400mwh project. "The engineering, procurement and construction job for battery installation is less technically.

The Energy Commission of Malaysia launched the country's first competitive procurement programme for grid-connected Battery Energy Storage Systems

(BESS), marking a significant step in the nation's energy transition. Structured as a two-stage bidding process, the programme targets 400MW/1,600MWh of. Why is Malaysia launching a Bess project?

The inaugural development of public BESS project in Malaysia is part of the Government's efforts to support the energy transition and achieve the goals of increasing the country's installed renewable energy capacity to 70% and to achieve net-zero by 2050.

What is the bidding process for the Bess programme?

For the BESS programme led by the Ministry of Energy Transition and Water Transformation (Petra), the bidding process will be conducted in two stages, starting with a request for qualification (RFQ) where interested bidders may submit their qualifications to the Energy Commission (EC).

What are the benefits of Bess in Malaysia?

The transformative power of BESS in Malaysia extends beyond environmental benefits. It catalyses advancements in smart grid technology and energy management systems, promoting efficient energy usage and emissions reduction.

Can Malaysia emerge as a key player in the Bess industry?

With supportive policies and rich renewable resources, Malaysia can emerge as a significant player in the BESS industry. A central pillar of MyRER's post-2025 strategy involves prioritising cost-effective energy storage solutions, including battery storage.

How will peak energy demand affect Malaysia's energy prices?

Furthermore, peak energy demand in Malaysia is expected to rise on average by 1.6 % annually till 2030, increasing grid system costs from RM 28.79 billion (2021) to RM 41.96 billion (2030), which will likely be passed on to the consumer, resulting in higher energy prices.

Why should you invest in Bess in Malaysia?

BESS offers not only environmental benefits but also lucrative investment opportunities. As Malaysia works towards reducing its carbon footprint and meeting green energy targets, BESS provides a reliable, efficient solution to store and distribute green energy from intermittent renewable sources such

as solar, biomass, biogas, and hydropower.
