

Bakersfield solar battery backup

Overview

Do I need a solar battery in Bakersfield?

No, you don't need to install a solar battery in Bakersfield. Solar panels can operate and lower your electricity bill even without a battery. However, a solar battery might be a worthwhile investment in some cases. A battery can provide backup power and priceless peace of mind in places with prolonged grid blackouts or extreme weather events.

Who should I choose for solar in Bakersfield?

Here are the top companies we recommend for solar in Bakersfield: With Sunrun, you get a new, modern energy experience – the freedom to power life how and when you want with reliable, affordable energy made from the sun. I became an early adopter of SunRun's solar system in 2013.

How much does solar cost in Bakersfield?

The average price of solar is about \$2.14 to \$3.22 per watt in Bakersfield, so anything in that range is a fair price. Some prices may be too good to be true. If your installer quotes you way below the average price in your area, proceed with caution. Installers must charge fair prices to remain in business and provide you with 25 years of support.

Are solar incentives a good idea in Bakersfield?

Solar incentives and rebates can cut the cost of installing solar in Bakersfield by thousands of dollars. The most significant incentive is the 30% federal solar tax credit, available to any taxpayer in the country when they purchase solar panels or battery storage.
