

Battery life solar 2 review

Overview

Battery life is excellent, but your results will vary based on a few factors. Garmin rates this watch at 28 days of battery life in smartwatch mode; however, that assumes you're going to be out in the sun for three hours per day to use solar charging. How long does a Garmin Instinct 2 solar battery last?

The aspect where the Instinct 2 Solar truly shines is the battery department. Garmin states you get up to 28 days of battery life on a single charge and unlimited battery life with solar charging.

Is the Instinct 2 Solar worth buying?

Still, there's going to be an audience who will enjoy the Instinct 2 Solar; it's just not for everyone. The Instinct 2 Solar was released in April 2023, but it's still one of Garmin's best mid-tier GPS watches today.

Why should you buy a sense 2 solar watch?

The solar charging capability through the watch face extends battery life significantly, reducing the need for frequent recharging when on the trail. While equipped with only a single-band GPS, the Instinct 2 Solar still has impressive accuracy, even in tight canyons or mountain valleys. We never experienced any skipping.

Should you buy the Instinct 2 solar smartwatch?

Most of the smartwatch features on the Instinct 2 Solar are nice-to-haves and are best thought of as things you can use if you want, but aren't the core experience, and are not the main reasons you should be looking to buy one. It excels in tracking, and one other things. Battery saver modes (!) That thing is battery life.

Is the Instinct 2 solar good for backcountry use?

The Instinct 2 Solar also has a host of features, making it great for backcountry use. While it cannot download maps, it can upload routes to

follow. It also has breadcrumb navigation for back-to-start tracing. We were also impressed with the ability to add waypoints while on the go.

How accurate is the Instinct 2 solar heart rate monitor?

But the Instinct 2 Solar has been a reliable and accurate heart rate monitor. We've found steady runs to be within 1-3bpm of a chest strap, which is too close to derive any accuracy superiority.
