It costs about \$11,000 to install solar batteries—how much you save depends on where you live. Why trust EnergySage?

As subject matter experts, we provide only objective information. We design every article to provide you with deeply-researched, factual, useful information so that you can make. How much does a solar battery cost?

Historically, solar batteries have had a reputation for being prohibitively expensive, with many recorded instances where adding storage doubled the cost of a home solar installation. You can expect to pay between \$7,000 and \$18,000 for a solar battery.

What is a solar panel battery?

Solar Panel Batteries are links between the solar panels and the sources of electricity consumption that provide your house with constant electric power 24 hours a day. Since the batteries stabilize the voltage that flows into the grid, they are used to store the excess solar energy and to protect appliances from electrical disturbances.

Can solar batteries save you money?

Solar batteries can also save you money on utility power long-term. When utility costs are at their peak, you can pivot your home's energy consumption to run off of battery power rather than grid power, leveraging the electricity your solar panels generated when you need it most.

Are solar batteries worth it?

Solar batteries typically cost \$10,877 after the federal tax credit—which expires for batteries installed after December 31, 2025—for the 13.5 kilowatt-hours (kWh) of storage a typical home needs to keep essential devices running during outages (also the size of a Tesla Powerwall 3). Whether they're worth it depends entirely on your situation.

How much does a battery cost on EnergySage?

On EnergySage, Pytes USA Energy offers some of the most affordable batteries at about \$651/kWh. You'll typically pay the most for Enphase batteries, which cost about \$1,510/kWh. \*The average price per kWh of the 10 most quoted batteries on EnergySage in the first half of 2025 (excluding Panasonic, which is closing its solar and storage business).

What is the DoD of a solar panel battery?

Lead-acid batteries usually have a DOD of 50%, and lithium-ion batteries can be easily discharged by 80% and recharged back again. Constant deep discharge leads to an early death of a solar panel battery. There are two main types of batteries on the market: Devices that use grid photovoltaic and battery inverters.
