

Battery storage solar power vermont

Overview

Even though Vermont does not currently have a comprehensive statewide battery storage incentive program, the largest utility in the state, Green Mountain Power (GMP), has stepped in with two key programs to make battery storage more accessible and affordable for its customers: the Bring Your Own Device (BYOD) program and the Tesla Powerwall pilot program. Should you add a solar power battery backup in Vermont?

Photo courtesy of Tesla 36% of solar shoppers consider adding a solar power battery backup in Vermont, according to a recent industry survey. And with plenty of good reasons. Solar energy storage offers peace of mind, helps ensure that your system will always run, and has never been more accessible to homeowners.

Does Vermont have a home battery program?

Since 2015, Vermont's Green Mountain Power has helped a limited number of customers install home batteries each year. Now the program cap is gone. One of the nation's first and most prolific home battery programs is gearing up for unprecedented growth.

How many batteries are there in Vermont?

Now that fleet has grown to 4, 800 batteries totaling 27 megawatts of capacity. After a string of extreme weather disasters in Vermont this year, more customers asked for batteries to power their homes through winter storms, floods and heat waves.

How much does a battery system cost?

The "bring your own device" offering pays households that buy and install their own battery system up to \$ 10, 500, a substantial chunk of the cost for popular models.
