SACRAMENTO — New data show California is surging forward with the buildout of battery energy storage systems with more than 6,600 megawatts (MW) online, enough electricity to power 6.6 million homes for up to four hours. The total resource is up from 770 MW four years ago and double the amount.

Installed battery storage capacity in California has grown from just 500MW in 2018 to more than 13,300MW at the latest count. According to the newest Energy Storage Survey published by the California Energy Commission (CEC), as of 11 September 2024, there is 13,391MW of cumulative battery storage.

California has set ambitious clean energy standards, mandating that 100% of the state's electricity be supplied by renewable and zero-carbon resources by 2045, with interim targets of 60% by 2030 and 90% by 2035. In order to meet these goals, California must be able to successfully store solar and.

California is a world leader in energy storage with the largest fleet of batteries that store energy for the electricity grid. Energy storage is an important tool to support grid reliability and complement the state's abundant renewable energy resources. These technologies capture energy generated.

Installed battery storage capacity in California, US has grown from 771MW in 2019 to more than 15,500MW as of 31 January, 2025. According to the new California Energy Storage System Survey from the California Energy Commission (CEC), the state's battery storage capacity totals 15,763MW. Of this.

US grid-scale battery storage capacity is expected to nearly double this year,

with the largest growth anticipated in California and Texas. Here's what you need to know. In the past four years, California has installed more large-scale batteries than any other place in the world, except for China.

US grid-scale battery storage capacity is expected to nearly double this year, with the largest growth anticipated in California and Texas. Here's what you need to ...

### [California Battery Storage Still Rising: How This Will](#)

US grid-scale battery storage capacity could nearly double this year with the largest growth anticipated in California and Texas. Here's what to know.

### **CEC Awards \$42 Million Grant for Long-Duration Energy Storage ...**

SACRAMENTO -- The California Energy Commission (CEC) today approved a \$42 million grant to build a long-duration energy storage project at Marine Corps Base Camp ...

### [2022 Nonresidential Battery Storage Systems](#)

The 2022 Building Energy Efficiency Standards (Energy Code) has battery storage system requirements for newly constructed nonresidential buildings that require a solar

photovoltaic ...

### Giant batteries strengthen California's power grid, cut ...

Battery storage has increased sevenfold in the past five years in California, from 1,474 megawatts in 2020 to 10,383 megawatts now. A ...

### California Advances Battery Storage Amid Safety Concerns

California tackles battery storage safety post-Moss Landing fire. Learn about A.B. 303, S.B. 283, Governor Newsom's initiatives, and clean energy goals

### New California Bill AB 303 Targets Battery Storage Safety

AB 303 aims to enhance safety standards for large-scale battery storage in California, with local approval authority and mandatory buffer zones from sensitive areas

[Engie goes to CEC for BESS approval after local ...](#)

Image: Intersect Power. After failing to obtain local approval for the construction of a 250MW/1,000MWh standalone battery energy storage ...

**New California bill would give locals say in battery ...**

California Assemblymember Dawn Addis has proposed a new bill that would grant more local control over proposed battery energy storage ...

**State Battery Storage Safety Collaborative , California ...**

Updated codes and standards for battery facilities CAL FIRE - Office of the State Fire Marshal recently adopted a suite of updated fire safety codes for battery ...

**CEC Approves World's Largest Solar + Battery Storage Project in ...**

SACRAMENTO - The California Energy Commission (CEC) on Wednesday approved the Darden Clean Energy Project (DCEP), the first to be permitted under the state's ...

## New Report: Battery Storage Saves Californians Money, ...

"This report clearly demonstrates the significant gap between the economic and social impacts of gas plants and those of battery storage paired with clean energy."

## [Largest battery storage project wins fast-track ...](#)

The California Energy Commission (CEC) approved the Darden Clean Energy Project, the first to be fast tracked under its Opt-In Certification ...

## [CEC Awards \\$30 Million to 100-Hour, Long-Duration ...](#)

The state estimates more than 48 gigawatts (GW) of battery storage and 4 GW of long-duration storage will be needed to meet the goal of ...

## CSLB Staff Report in Consultation with Expert Consultants

Introduction Battery energy storage systems (BESS), and particularly lithium-ion BESS, developed substantially and expanded rapidly in use in recent years. In response to the ...

## 2025 LUENR Update: California Battery Energy Storage Update

Battery storage systems are key to California's ability to meet energy demand, but the current installed battery storage capacity is over 20% of California's peak demand. The ...

## CPUC Adopts New Rules Governing Safety of Battery Energy Storage ...

Battery energy storage projects are essential for California to provide reliable energy supplies and meet its goal of a zero-carbon future by 2045. The state's projected need ...

## [California Battery Storage Capacity Expands Rapidly](#)

The recent surge in battery storage has significantly enhanced California's ability to maintain grid stability during extreme weather. Throughout the summer of 2024, ...

## California: new BESS regulations come in, SDG& E adding ...

Further developments from the California market including new standards for BESS maintenance and operation, added energy storage capacity.

### California Has Over 15,000 MW Of Energy Storage

Is most of the energy storage paired with solar or wind power? At this time, battery energy storage systems are predominantly co-located with solar PV systems.

### California crosses 10 GW battery storage threshold

California is adding massive amounts of battery energy storage and the project pipeline shows no sign of slowing down. Batteries are playing ...

### **California: 'Energy storage revolution is here,' says ...**

California now has more than 10GW of battery storage, with Governor Gavin Newsom hailing "energy storage revolution," which is underway.

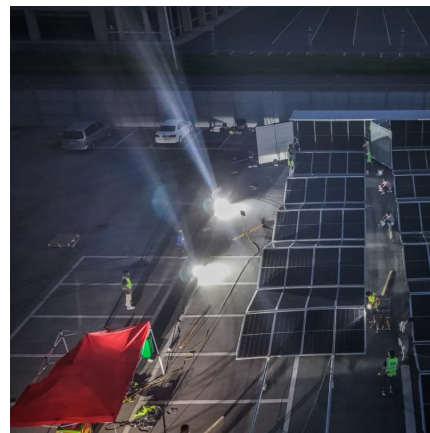

[State boosts critical battery storage project at](#)

SACRAMENTO - California is boosting battery storage projects across the state - an important part of the state's transition to 100% clean electricity. California today ...

**New Report: Battery Storage Saves Californians Money, ...**

Battery storage saves Californians money while improving public health compared to gas-fired power plants, according to new research from Regenerate California (a ...

**Battery Energy Storage Systems**

High-Rise Multifamily buildings and some nonresidential building categories are prescriptively required to have a battery energy storage system. Performance compliance credit is also ...
