What is solar power charging?

Solar power charging involves using solar panels to convert sunlight into

electrical energy. This energy then charges batteries, allowing you to power various devices like phones, laptops, or larger equipment. Most solar charging systems include a solar panel, a charge controller, and a rechargeable battery.

Can a solar panel damage a battery?

However, before you can get started, you'll need to install a charge controller, which regulates the voltage from the solar panel as it's transferred to the battery. Otherwise, on sunny days, the solar panel may produce more energy than your battery can handle, which can damage the battery.
