

# **Cheapest backup power battery installation offer in Germany**

## Overview

---

How much does a solar battery backup cost?

For larger residential properties and small commercial establishments, solar battery backup systems in the 10-20kWh range typically cost between €9,000 and €18,000. This price range includes premium battery solutions from established manufacturers, advanced inverter technology, and professional installation.

Are battery storage systems subsidized?

Battery storage systems are subsidized with a wide variety of grants, loans and programs you should be taking advantage of. And because finding the right program isn't easy, since they vary between states, it is important to seek advice from local specialists so that nothing stands in the way of you and your energy storage subsidy.

Should you consider a home storage system in Germany?

Regional subsidies – it pays to be quick and informed! The first point of contact for anyone considering an electricity storage system should be their federal state-regional funding for home storage systems in Germany offers a wide and dynamic range of options, with new programs being set up all the time.

How much does a battery storage unit cost?

Battery storage units come in various types, with lithium-ion batteries leading the European market due to their efficiency and longevity. For residential installations, entry-level lithium-ion systems (5-10 kWh) typically range from €4,000 to €7,000, while premium models can reach €12,000.

How do I buy a photovoltaic system?

As a rule, you must apply for a subsidy for a photovoltaic system or a battery storage system before buying the system. You must also apply for a loan from

the KfW before purchase. As soon as your application has been received and approved, you can usually have the system installed.

Are photovoltaic home storage systems subsidized?

This year, photovoltaic home storage systems have been subsidized through a 34-million euro investment (more information here). In Baden-Württemberg, the “Grid Service Photovoltaic Battery Energy Storage” funding program, which was well-received in both 2018 and 2019, resumed on 1 April 2021 - however, all funding has already been allocated.
