

Cheapest grid tied storage system installation offer in Greece

Overview

This new program can cover 20-65% of PV system costs, ranging from EUR 280 to EUR 1200, and 90-100% of ESS costs, ranging from EUR 600 to EUR 890. Applicants of the program can install up to 10.8 kW of PV capacity and 10.8 kWh of energy storage capacity. How much grid space is available for small PV systems?

The 2 GW of grid space is available for small PV systems up to 10 kW in size, and will be offered on a first-come, first-served basis. About 40% of this will be offered to residential net-metering systems, while 30% of it will be given to small commercial PV systems. The remaining 30% will be allocated to agricultural PV projects.

How much a storage system is subsidized?

In both cases, only the storage system is subsidized. The size of the subsidy depends on the company submitting the application – the number of its employees and annual turnover. It is set at 30% of the system cost for large companies, 40% for medium-sized companies, and 50% for small companies.

How much money will be allocated to small businesses in Greece?

A total of EUR 100 million in grants will be allocated for micro and small enterprises with the remaining share reserved for medium and large enterprises. All beneficiaries of the program should be existing businesses operating in the territory of Greece and established by June 30, 2024.
