

# **Cheapest standalone energy storage installation offer in Slovakia**

## Overview

---

How long will a gas storage facility last in Slovakia?

Its construction should last about one year. The current underground gas storage capacity in Slovakia is about 3 billion cubic metres. The existing facilities are operated by companies Nafta and Pozagas. Another locality suitable for construction of a gas storage facility is in Ptrukša in eastern Slovakia.

What is BIPV & how does it work in Slovakia?

From day one, we've been breaking new ground in Slovakia's solar energy sector. We were one of the first company in Slovakia to install Building-Integrated Photovoltaics (BIPV). We led the way with the first-ever 400kWh Battery Backup System, even before container-based battery systems became mainstream.

What is the capacity of energy storage facility?

Energy storage facility of a cumulative installed capacity of 384 MW, storage capacity allowing a net annual electricity generation of 250 GWh. The storage will consist of several smaller units (~32-64MW) located in Slovakia (central Europe).

## Cheapest standalone energy storage installation offer in Slovakia
