

# China energy storage high-end forum

## Overview

---

What is the future of energy storage in China?

In China, generation-side and grid-side energy storage dominate, making up 97% of newly deployed energy storage capacity in 2023. 2023 was a breakthrough year for industrial and commercial energy storage in China. Projections show significant growth for the future.

What is China's energy storage strategy?

In China, generation-side and grid-side energy storage dominate, making up 97% of newly deployed energy storage capacity in 2023. In China, generation-side and grid-side energy storage dominate, making up 97% of newly deployed energy storage capacity in 2023. 2023 was a breakthrough year for industrial and commercial energy storage in China.

What is China International Energy Storage Conference?

The China International Energy Storage Conference is a platform focusing on industrial energy storage manufacturing. Here we showcased new technologies and were very happy to see many customers coming to our booth to communicate. In the future, we will participate in the exhibition with better solutions.

What is the energy storage exhibition & docking platform?

It is one of the most influential industry exchange and docking platforms in the global energy storage field, and is known as a high-standard exhibition with high gold content and strong guidance in the energy storage industry. It is a weathervane for the development of China's energy storage industry.

How effective are policy frameworks for energy storage deployment?

CNESA's research revealed that some regions have made solid results in energy storage deployment driven by effective policy frameworks. For example, Zhejiang province has a vast array of energy demand scenarios but

faces problems such as high construction costs and long recovery cycles.
