

China-europe lithium energy storage power supply customization enterprise

Overview

Does Europe rely on Chinese refined lithium?

Europe's dependence on Chinese refined lithium is a critical issue. China dominates the global refined lithium market, controlling 82% of the global refined capacity for Battery Grade Lithium Hydroxide Monohydrate (BG LHM) in 2024 and 60% for Battery Grade Lithium Carbonate. This reliance poses several risks:.

Why is a stable lithium supply chain important?

A stable and secure lithium supply chain is crucial for Europe's energy transition and achieving its climate goals. According to the European Commission, the global demand for lithium is projected to increase 14-fold by 2040 compared to 2020 levels. The exponential growth of EVs and energy storage systems should drive this surge.

Why is lithium important?

Energy Security: Lithium is essential for producing batteries used in EVs and renewable energy storage systems. A stable and secure lithium supply chain is crucial for Europe's energy transition and achieving its climate goals.

Is a national lithium industry a threat to the regional battery supply chain?

Most European governments consider this a threat to the regional battery supply chain and have consequently launched national and regional initiatives to promote a domestic lithium industry. Back in April 2024, the EU has adopted the CRM Act or Regulation (EU) 2024/1252.
