

Connect battery on hoist to shelf and solar charger

Overview

The ShoreStation 3 Boat lift solar chargers are specifically designed to provide 3 reliable, trouble-free charging and maintenance of your ShoreStation lift battery.

The ShoreStation 3 Boat lift solar chargers are specifically designed to provide 3 reliable, trouble-free charging and maintenance of your ShoreStation lift battery.

Connecting the batteries involves linking them in a way that suits the hoist's requirements. Whether in series or parallel, the configuration must meet the voltage needed for the operation.

In this video, I explain my situation, show the parts that come with the kit, show how I modified and installed the battery tray, and complete the installation.

I am looking to keep a group 31 size deep cycle 12v battery charged for a boat lift motor. Using my battery I only get about 5 lift cycles out of the battery and I average 2-4 cycles per day.

Proper installation of this charging system will maximize your charger's performance and will ensure your battery maintains a sufficient charge for your lift system. This manual will provide you with information on the proper installation of your solar panel.

Connect battery on hoist to shelf and solar charger
