

Container energy storage explosion-proof camera

Overview

What are explosion proof cameras?

The options may be chosen on the product page Explosion proof cameras are critical for monitoring operations in hazardous areas where flammable gases, vapors, or dust may be present. These environments demand specialized surveillance solutions that can withstand extreme conditions without compromising safety or image quality.

Why do oil refineries need explosion-proof cameras?

Oil refineries face explosive environments where common cameras can become ignition sources during electrical faults. Explosion-proof cameras contain internal faults within reinforced enclosures, provide corrosion resistance, enable real-time monitoring, and preserve evidence for investigations.

How ACTI anti-explosion cameras protect your facility?

Protect Your Facility: How ACTi's Explosion-Proof Cameras Save Lives in Dangerous Zones! ACTi's anti-explosion cameras offer unparalleled safety in hazardous environments like chemical plants, mines, and oil refineries.

How do explosion-protected cameras work?

You can use explosion-protected cameras to monitor operations and processes with remote visual verification of readings from gauges and sensors across your sites. And our thermal and temperature alarm cameras monitor for overheating of equipment.

What are axis explosion-protected cameras?

Axis explosion-protected cameras are designed and certified to be used around the world, from arctic to desert climate, with a full range of power and network connectivity. They're certified Class I/II/III Div 1 and Zone 1,21 (according to NEC, CEC, ATEX, IECEx, and more) and Class I/II/III Div 2 and

Zone 2,22 (according to NEC, CEC, ATEX, IECEx).

Are tecnovideo CCTV equipment explosion-proof?

The complete range of Tecnovideo's explosion-proof certified stainless steel (AISI316L) CCTV equipment and accessories are designed to be installed in the most severe environments.
