

# **Cost of solar panels and batteries**

## Overview

---

How much does a solar battery cost?

Historically, solar batteries have had a reputation for being prohibitively expensive, with many recorded instances where adding storage doubled the cost of a home solar installation. You can expect to pay between \$7,000 and \$18,000 for a solar battery.

How much do solar panels cost?

Here's a breakdown of residential and commercial solar panel prices. Residential solar panel prices typically range from \$15,000 to \$30,000 before any applicable tax credits or incentives. Costs depend on several factors:  
System Size: Larger systems usually have higher upfront costs but can lead to more significant energy savings.

How much does solar battery maintenance cost?

The cost to hire a local solar company to inspect and maintain your battery system is anywhere between \$150 and \$300 on average. Solar batteries last longer when you maintain them regularly. Maintenance includes an inspection, rotating the batteries, and cleaning the terminals.

Is solar battery storage worth the cost in 2025?

Whether solar battery storage is worth the cost in 2025 is totally up to you and your energy goals. If you experience frequent or long-lasting power outages, then having battery storage for backup power can be a game-changer in keeping you safe, productive, and comfortable (not to mention keeping your food from spoiling!).

Should you invest in a solar battery system?

Whether you're ready to take your love of reusable batteries to the next level or make use of that excess solar energy your solar panels generate, investing in a solar battery system is a great way to harness the power of the sun for

free electricity. But before you can start saving, you'll need to budget for the cost of a solar battery system.

What factors affect the price of a solar battery?

The biggest factor that impacts the price of a solar battery is its capacity – the total amount of energy that it can store. For instance, there are 5 kWh batteries used mostly for improving the economics of solar, and there are 40 kWh battery systems that can back up your entire home during a power outage.
