

Costa rica electric energy storage company plant operation information

Overview

Is solar power a new energy source in Costa Rica?

Like wind power, solar power is another newer energy source in the country. The first solar power projects in the country were established in 1978 by just a few researchers from public universities at the Solar Power Laboratory at the National University. During 2012, Costa Rica inaugurated the Miravalles Solar Plant next to the Miravalles Volcano.

How much energy does Costa Rica produce?

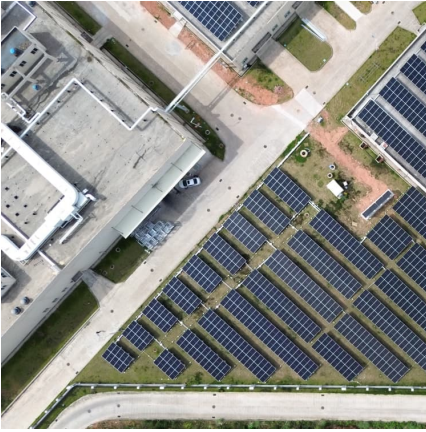

The project's totaling was \$11.5 million (\$10 million from JICA and \$1.5 million from ICE. This plant of 1MW only represents 0.03% of all the capacity installed in the country. Currently, Costa Rica generates less than 1% of its energy production using solar power. The rest of the production is 79% Hydro, 12% Wind and 8% Geothermal.

Does Costa Rica have a monopoly on electricity?

Explore oil and gas export opportunities and the regulatory environment in Costa Rica. The Costa Rican Institute of Electricity (ICE) holds a monopoly over electricity distribution and generation in Costa Rica. There are some exceptions where other public institutions and co-operatives are authorized by law to generate and sell electricity.
