

Customs code for portable energy storage box

Overview

What is the HS code for energy storage?

SPECIFIC CUSTOMS CODE FOR ENERGY STORAGE The HS code that typically pertains to energy storage systems, particularly lithium-ion or lead-acid batteries, is 8507.60. This designation covers various types of batteries utilized in energy storage applications, playing a vital role in commercial and residential energy systems.

What are the different types of energy storage products?

Common energy storage products include lithium-ion batteries, lead-acid batteries, and flow batteries, each having distinct HS codes. The HS code for lithium-ion batteries typically falls under 8507.60, whereas lead-acid batteries may also share similar classifications.

Is the HS code for a storage box the same?

No, the HS code for a storage box is not the same in every country. While the first six digits are standardized globally, the last digits can vary based on national regulations and specific classifications. What happens if the HS code is incorrect?
