## Overview

---

What is a deep cycle solar battery?

Deep cycle solar batteries are specifically designed to withstand the repeated charging and discharging cycles that occur when you are dealing with solar power. You can wire multiple solar batteries together in either a series or parallel connection to achieve different voltages and capacity totals.

What are the different types of 100Ah deep cycle batteries?

There are two types of 100Ah deep cycle batteries available from Batteries Plus: Lead acid and Lithium Iron phosphate (LiFePO<sub>4</sub>). The key differences between the two are performance and price. LiFePO<sub>4</sub> batteries will cost more upfront, but run longer, recharge faster and have much longer lifespans.
