## Overview

---

What is a battery energy storage system (BESS) e-book?

This document e-book aims to give an overview of the full process to specify, select, manufacture, test, ship and install a Battery Energy Storage System (BESS). The content listed in this document comes from Sinovoltaics' own BESS project experience and industry best practices.

How to compare battery energy storage systems?

In terms of \$, that can be translated into \$/kWh, the main data to compare Battery Energy Storage Systems. Sinovoltaics' advice: after explaining the concept of usable capacity (see later), it's always wise to ask for a target price for the whole project in terms of \$/kWh and \$.

What should be included in a contract for an energy storage system?

Several points to include when building the contract of an Energy Storage System:

- Description of components with critical technical parameters: power output of the PCS, capacity of the battery etc.
- Quality standards: list the standards followed by the PCS, by the Battery pack, the battery cell directly in the contract.

When should a battery energy storage system be inspected?

Sinovoltaics advice: we suggest having the logistics company come inspect your Battery Energy Storage System at the end of manufacturing, in order for them to get accustomed to the BESS design and anticipate potential roadblocks that could delay the shipping procedure of the Energy Storage System.

When does an energy storage project start?

“The operations and maintenance phase of an energy storage project begins when the system has been successfully commissioned and the owner has obtained approval to operate the system.

Do battery energy storage systems look like containers?

C. Container transportation Even though Battery Energy Storage Systems look like containers, they might not be shipped as is, as the logistics company procedures are constraining and heavily standardized. BESS from selection to commissioning: best practices<sup>38</sup> Firstly, ensure that your Battery Energy Storage System dimensions are standard.

## Design specifications for energy storage power stations on factory
