

# Dodomazimbabwe shared energy storage

## Overview

---

How to create a shared energy storage community?

Community setup The first step to have shared energy storage is to form communities which are built by using the k -means approach. The geographical locations (longitude and latitude) are used to cluster the households. In this case,  $K = 3$  is used to form three communities due to the distance limitation of CES and the road intersection.

Should community energy storage be used instead of private energy storage?

Computational results are presented on two real use cases in the cities of Ennis, Ireland and Waterloo, Canada, to show the advantage of using community energy storage as opposed to private energy storage and to evaluate the cost savings which can facilitate future deployment of community energy storage.

What are distributed energy resources?

Distributed Energy Resources consist primarily of energy generation and storage systems utilized by individual households or shared among them as a community. In contrast to individual energy storage, the field of community energy storage is now gaining more attention in various countries.

How k-means can be used to allocate energy storage?

By using k -means to allocate energy storage and formulating a MILP model to optimize the operational cost, different scenarios, including different types of appliances, PV systems, energy storage, and household power consumption profiles are compared in an individual setup as well as a community setup.

Do households own energy storage and not share energy resources?

In this part, we consider the case where households own individual energy storage and do not share these resources, i.e, own PESs. The first observation is that when households install PV systems and PESs, the flexibility of

controlling their demand is much higher and thus the aggregator's electricity cost can decrease significantly.

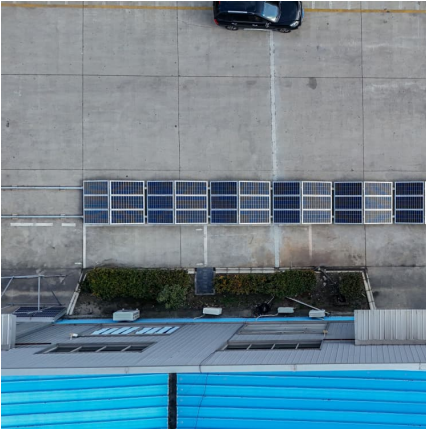

What are energy storage devices?

Energy storage devices are used to store power generated by PV systems or adjust the households' power consumption.

## Dodomazimbabwe shared energy storage
