

Domestic energy storage cost breakdown in Guernsey 2025

Overview

This increased the cost of fossil fuels used by our power station generators to 'top up' Island demand and the parts needed to maintain our electricity network including assets such as underground cables and substations.

This increased the cost of fossil fuels used by our power station generators to 'top up' Island demand and the parts needed to maintain our electricity network including assets such as underground cables and substations.

Electricity prices are changing from 1st July 2025. We know that the cost of living is high, that is why we worked hard to keep this year's increase as low as possible to try and minimise the impact on Islanders. The primary standing charge will increase from £68.25 to £86.75 per quarter - an.

This tariff is available to customers with their own generating equipment, wishing to export power to Guernsey Electricity. *Standby charge relates to non-renewable energy installations only and set in accordance with CICRA 19/16 "Standby Charge for Embedded Electricity Generation" effective 3rd.

Where Guernsey Electricity is required to provide a standby electricity service for 'behind the meter' non-renewable energy installations (including CHP) with generation capacity in excess of 25kW, a monthly charge will be applied. For every kW of installed capacity, we charge the standby rate.

Electricity prices will increase by 8% from July. The 8% rise follows a 10% increase at the same time last year and will be split for customers across the charge per unit and the fixed standing charge. / Guernsey Press The States' Trading Supervisory Board agreed the increase after Guernsey.

Economy 24 Central Heating tariff of 19.59p per unit. The annual costs includes a servi charge of 44.79p per day, which equa sed during the 12hrs outside the twelve hour Low Rate. The Low units are a 10 hour period between 7:45pm & 8:15am and a 2 hour period between 12:00pm & 4:40pm. The annual. What is the maximum resale price for electricity in Guernsey?

Guernsey Electricity Limited, in accordance with section 23 (2) (b) of the

Electricity (Guernsey) Law 2001, hereby gives notices that the maximum resale price at which electricity can be resold by persons to whom it is supplied is *25 pence per unit. What Is A Tariff?

Put simply, a tariff calculates your bill.

How much would a low-usage household spend on electricity in Guernsey?

Using the analysis, a typical low-usage household in Guernsey would spend £637 a year on electricity from July. Depending on the region, in Britain they could expect to save between £7 and £123 a year - between 1% and 19% less than Guernsey.

Why did Guernsey increase electricity prices?

The decision comes after Guernsey Electricity (GEL) applied to the government for an increase of 9.5% because its long-term fixed - price agreements for the import of electricity are due to end. The STSB said the quarterly standing charges for households would rise from £68.25 to £86.75, the equivalent of about 95p per day.

How does Guernsey Electricity work?

To help keep the lights on, our homes warm and the Wi-Fi running, Guernsey Electricity collects tariffs from every customer on our electricity network. Put simply, a tariff is the price used to calculate your electricity bill.

Does Guernsey Electricity charge a monthly charge?

Where Guernsey Electricity is required to provide a standby electricity service for 'behind the meter' non-renewable energy installations (including CHP) with generation capacity in excess of 25kW, a monthly charge will be applied. For every kW of installed capacity, we charge the standby rate'.

Is Guernsey a good place to buy electricity?

However, heavy electricity users are better off in Guernsey, with a high-usage household to spend on average £1,503 a year from July. The analysis showed British households could expect to spend between £42 and £244 more a year - up to 16% more.
