

# **Domestic energy storage installed capacity surges**

## Overview

---

That makes Q1 2025 the biggest first quarter for energy storage in US history. The surge was led by utility-scale projects, which accounted for over 1.5 GW of the new capacity, a 57% jump compared to Q1 2024.

That makes Q1 2025 the biggest first quarter for energy storage in US history. The surge was led by utility-scale projects, which accounted for over 1.5 GW of the new capacity, a 57% jump compared to Q1 2024.

HOUSTON/WASHINGTON, June 18, 2024 – The U.S. energy storage market set a first-quarter record for capacity installed in Q1 2024, with 1,265 megawatts (MW) deployed across all segments. This marks the highest storage capacity ever installed in a first quarter in the U.S., representing an 84%.

The U.S. energy storage market set a new record in 2024 with 12.3 gigawatts (GW) of installations across all segments, according to the latest U.S. Energy Storage Monitor report released today by the American Clean Power Association (ACP) and Wood Mackenzie. The report shows a total of 12,314.

The US energy storage market just posted its strongest Q1 ever, adding more than 2 gigawatts (GW) of capacity across all segments, according to the latest US Energy Storage Monitor from Wood Mackenzie and the American Clean Power Association (ACP). That makes Q1 2025 the biggest first quarter for. What is the highest energy storage capacity ever installed in Q1 2024?

HOUSTON/WASHINGTON, June 18, 2024 – The U.S. energy storage market set a first-quarter record for capacity installed in Q1 2024, with 1,265 megawatts (MW) deployed across all segments. This marks the highest storage capacity ever installed in a first quarter in the U.S., representing an 84% increase from Q1 2023.

Why did energy storage surge in Q1 2025?

That makes Q1 2025 the biggest first quarter for energy storage in US history. The surge was led by utility-scale projects, which accounted for over 1.5 GW of the new capacity, a 57% jump compared to Q1 2024. Surging energy

demand is putting the electric grid under strain,” said John Hensley, SVP of markets and policy analysis at ACP.

What did the energy storage sector do in Q2 2024?

This audio is auto-generated. Please let us know if you have feedback The U.S. energy storage sector marked its second strongest quarter on record in Q2 2024 with 2.9 GW of newly installed capacity, a 62% jump from Q2 2023, the American Clean Power Association said Thursday in its latest clean power quarterly market report.

How much energy storage is being deployed in 2024?

Over 12.3 GW and 37.1 GWh of energy storage was deployed in the U.S. in 2024, Wood Mackenzie and the American Clean Power Association (ACP) reported. This represents 33% and 34% growth respectively over 2023 totals. Grid-scale storage deployments alone are expected to reach 13.3 GW in 2025.

How big will energy storage be in 2025?

Grid-scale storage deployments alone are expected to reach 13.3 GW in 2025. Across all segments, Wood Mackenzie expects 15 GW of storage deployments, growing another 25% over the record year of 2024. “Energy storage has entered a new phase of growth with its first year of double-digit deployment.

Which states have the highest energy storage capacity in Q1?

According to Wood Mackenzie and the American Clean Power Association’s (ACP) newly released US Energy Storage Monitor report, the grid-scale segment installed 993 MW, producing the highest Q1 on record for the grid-scale segment. Nevada, California, and Texas accounted for 90% of new grid-scale capacity added.

## Domestic energy storage installed capacity surges

---

### US Energy Storage Market Sets Q1 Capacity Installation Record

The U.S. energy storage market set a first-quarter record for capacity installed in Q1 2024, with 1,265 megawatts (MW) deployed across all segments. This marks the highest ...
