What is the market energy storage in Spain?

The market energy storage in Spain, particularly in relation to the BESS systems (Battery Energy Storage Systems), is undergoing a dynamic and accelerated evolution. This transformation is driven by the growing need to integrate renewable energy sources into the electricity grid, improve supply stability and optimize energy use.

How does Spain support the development of energy storage?

To support this growth, Spain has implemented several policies and regulations that encourage the development of energy storage. The Energy Storage Strategy 2030, promoted by the Ministry for the Ecological Transition and the Demographic Challenge, is one of the key initiatives. This strategy aims to achieve a storage capacity of 20 GW by 2030.

Will Spain get 20GW of new energy storage by 2030?

Spain is targeting 20GW of new energy storage by 2030. MITECO also launched a similarly-sized grant scheme specifically for co-located or hybridised energy storage projects, for which proposals were due in March 2023. Enel Green Power submitted two projects during the first quarter which fit the criteria, totalling 60MWh and 38MWh respectively.

How much storage capacity will Europe have by 2026?

By the end of 2026, the European industry association even expects total

storage capacity to increase by 300% to 32.2 GWh, equivalent to 3.9 million European households optimizing the self-sufficiency of their power supply and limiting their electricity costs.

Is the capacity market a good investment in Spain?

The capacity market in Spain represents an opportunity for the storage sector but cannot be considered the sole basis for investment. Its design must be complemented by a diversification strategy in other electricity markets to ensure the profitability and sustainability of projects.
