

# **Electric vehicle 2022 energy storage revenue**

## Overview

---

In July 2022, China released a proposal to extend its new energy vehicle (NEV) mandate for passenger cars from 2023 to 2025.<sup>10</sup> Based on the new NEV credit requirements, the EV share of China's new passenger vehicle sales is likely to at least exceed 25% by 2025.

In July 2022, China released a proposal to extend its new energy vehicle (NEV) mandate for passenger cars from 2023 to 2025.<sup>10</sup> Based on the new NEV credit requirements, the EV share of China's new passenger vehicle sales is likely to at least exceed 25% by 2025.

The International Council on Clean Transportation (ICCT) reviews progress on the global transition to electric vehicles (EVs) annually, and this briefing is a 2022 update.<sup>1</sup> The annual updates focus on market and policy progress made at the national and state levels, while city-level progress is.

The automaker's full-year 2022 earnings statement, released at the close of market Wednesday, revealed it delivered 405,278 electric cars in the fourth quarter -- up from 343,830 deliveries in the previous quarter. This brings Tesla's total deliveries in 2022 to 1.31 million cars, which is a record.

Sales of electric vehicles (EVs) doubled in 2021 from the previous year to a new record of 6.6 million. Back in 2012, just 120 000 electric cars were sold worldwide. In 2021, more than that many are sold each week. Nearly 10% of global car sales were electric in 2021, four times the market share in.

On Wednesday, the automaker said its home and utility-scale battery deployments reached 6.5 gigawatt hours (GWh) during its fiscal 2022, calling it "by far the highest level of deployments we have achieved." That's up from about 4 GWh in 2021. For context, the average American home consumes 10,632.

With the release of its Q4 2022 financial results, the automaker released its energy division's deployment number. Tesla Solar had a good quarter with 100 MW deployed, but the company really shined with its energy storage deployment: Powerwalls and Megapacks. Tesla confirmed that it deployed a.

Usage in electric vehicles (EVs) will drive the most growth — 92% of demand in 2040 — due to large pack sizes and a large addressable market. Stationary applications will capture dramatically less energy storage demand, but significantly higher system-level costs will capture nearly one-third of. How many EVs are there in 2022?

As shown in Figure 1, the global transition to EVs hit a milestone in 2022 with 10 million in annual EV sales, a 54% increase from 2021. Cumulative EV sales globally totaled 29 million by the end of 2022. Electric LDVs comprised 99% of global EV sales for the year, and the other 1% were electric HDVs. BEVs remained the dominant technology.

Where did EV sales go in 2022?

Japan hit an all-time high in EV sales of 92,000 in 2022, a 109% increase over the previous year, and improved its ranking from 17th in 2021 to 13th in 2022. Nascent markets in Southeast and South Asia grew their EV sales in the year.

How did electric vehicle sales perform in 2022?

Annual electric vehicle sales globally by vehicle category (left), technology pathway (middle), and market (right) from 2018 to 2022. Global electric HDV sales slightly declined in 2022 after reversing their previous downward trend in 2021 (Figure 2).

How much money has been spent on EVs in 2021?

Public spending on subsidies and incentives for EVs nearly doubled in 2021 to nearly USD 30 billion. A growing number of countries have pledged to phase out internal combustion engines or have ambitious vehicle electrification targets for the coming decades.

How many fuel cell EVs are there in 2022?

Among the 70,200 FCEVs deployed worldwide through 2022, 82% were fuel cell LDVs. South Korea is the world's leading market for FCEVs; its 29,500 in cumulative sales as of 2022 represented 43% of the global total.

What is the global EV charging market value?

The global market value of electricity for EV charging is projected to grow over 20-fold in the APS, reaching approximately USD 190 billion by 2030, which is

is equivalent to about one-tenth of today's diesel and gasoline market value.
