

Energy storage installers

Overview

Where can energy storage systems be installed?

In enclosed utility closets and storage or utility spaces. According to the standard, energy storage systems are not allowed to be installed in living areas of dwelling units or in sleeping units other than within utility closets and storage or utility spaces. Currently, there is no such similar requirements in BS 7671.

How do I find a reputable solar and storage installation company?

By doing the legwork for you, EnergySage makes it easy to find reputable solar and storage installation companies in your area. We've already vetted all of our installer partners, and keep a close watch over their performance to ensure their installations and customer satisfaction are up to the levels that you-and we-expect.

What is EnergySage?

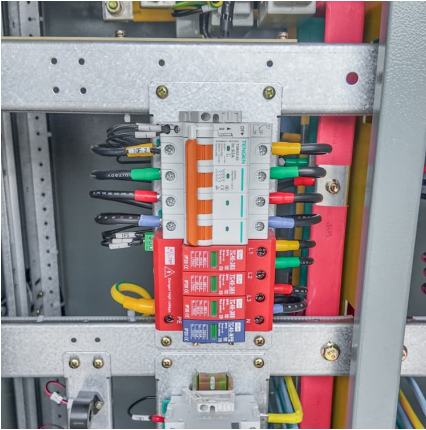

EnergySage is the nation's online marketplace for solar and storage: when you sign up for a free account, we connect you with companies in your area, who compete for your business with custom solar-plus-storage quotes tailored to fit your needs.

How do I choose a battery installer?

When you select an installer, you want to know that it's a reputable company, with a strong track record, that has all the appropriate licenses and certifications required in your state, as well as the specific training and certifications to be able to install the battery you want. Quite the long list!
