

# Energy storage lithium battery stocks

## Overview

---

What are energy storage stocks?

Energy storage stocks are companies that produce or develop energy storage technologies, such as batteries, capacitors, and flywheels. These technologies can store energy from renewable sources like solar and wind power, or from traditional sources like coal and natural gas.

What are the best solid-state battery stocks?

Below is our selection of the top seven solid-state battery stocks to watch. QuantumScape is a company dedicated to developing solid-state lithium batteries for electric cars. Backers include Volkswagen and Bill Gates. Solid Power develops solid-state cell and high-tech sulphide solid electrolyte batteries. Major partners include BMW and Ford.

What are lithium stocks?

Lithium stocks are commodity stocks that have principal interests in the mining, refining and distribution of lithium. The companies included under the umbrella of lithium stocks may be involved in the production of other metals and minerals, but lithium will be included in their portfolio.

Who makes a lithium battery?

One of the largest lithium battery producers on the planet, Panasonic is the go-to company for firms that need energy storage products for EVs, grid-scale storage and other next-gen battery applications.

Are energy storage stocks a good investment?

Currently, energy storage stocks are a relatively safe investment to make for the future, and if trends hold, they have solid potential for growth. However, if this doesn't appear to be a good fit for your investment portfolio, then it's best to look at other options.

Should you invest in a lithium & battery tech ETF?

For example, it commands a more than 9% allocation in the Global X Lithium and Battery Tech ETF (LIT), which boasts \$1.5 billion in assets at present. Therefore, if investors pile into exchange-traded funds, or ETFs, as a way to play lithium, ALB stock will see an outsized benefit from these capital flows.
