

# **Energy storage plan for the next five years**

## Overview

---

What is the 14th five-year plan for energy storage?

The “14th Five-Year Plan” has specified development goals for energy storage also on the provincial level. During the “14th FYP” period, 25 provinces and cities plan to complete 77.65 GW new type storage installation. That scale is more than twice the “14th FYP” target (30 GW) set by the NEA.

What is long duration energy storage?

Long Duration Energy Storage refers to the storage of energy in a system that can discharge electricity over time for a duration greater than 8 hours. It is a focus for storing renewable energy resources. (e.g., using sustainable feedstocks, power-to-liquids); 3.

What is next-generation energy storage?

Next-generation energy storage systems are based on novel chemistries, such as all-solid-state, Li metal, Li-sulfur, and metal-oxygen, to achieve significantly higher energy density. These batteries may use materials and their interfaces as key limiting factors and origins of failures.

How much energy storage does China have in 2023?

By the end of 2023, China had completed and put into operation a cumulative installed capacity of new type energy storage projects reaching 31.4GW / 66.9GWh, with an average storage duration of 2.1 hours. The newly added installed capacity in 2023 was approximately 22.6GW / 48.7GWh, which is three times that for 2022 (7.3GW / 15.9GWh).

What is the scope of energy storage in the PRC?

“ 新 型 能 源 储 存 项 目 范 围 包 括 调 度 控 制 的 新 型 能 源 储 存 和 电 力 厂 自 用 的 新 型 能 源 储 存 。” People’s Government of the PRC, 3 Jan 2023, at [https://www.gov.cn/jiaochang/2023/01/03/content\\_1891111.htm](https://www.gov.cn/jiaochang/2023/01/03/content_1891111.htm). The scope includes two categories: dispatch-controlled new type energy storage and self-used new type energy storage by power stations.

## Energy storage plan for the next five years

---

### [Renewable Energy in China's 14th Five-Year Plan: ...](#)

China's 14th Five-Year Plan has five critical changes about the development strategy of wind, solar, energy storage, and hydrogen industries.

### [THE 14TH FIVE-YEAR PLAN AND LONG-RANGE ...](#)

Section 2 Implement Our Energy and Resource Security Strategy In energy and resource security, we will continue to emphasize domestic supply while remedying shortcomings, ...

### [The Energy Transition in 2025: What to Watch For](#)

Indonesia has announced plans to switch fully to renewables in the next 15 years -- retiring all coal, oil, and gas power plants despite coal's ...

### **Towards carbon neutrality and China's 14th Five-Year Plan: Clean energy**

As China creates its next 14th Five Year Plan, for the years 2021-25, its actions in the aftermath of the pandemic are critical to how the world moves

forward. In September ...

### [National Blueprint for Lithium Batteries 2021-2030](#)

Lithium-based batteries power our daily lives from consumer electronics to national defense. They enable electrification of the transportation sector and provide stationary grid storage, critical to ...
