What are inflatable water tanks used for?

Inflatable Water Tanks are used for temporary storage of bulk liquids, recovered oils, fuels and potable (drinking) water, emergency water, rainwater, raw water. We offer a range of tank, with storage capacities from 5-50 m<sup>3</sup>. Portable storage tanks are manufactured from oil and fuel resistant PVC- Coated Polyester.

How do inflatable water tanks work?

Once the inflatable tanks are installed in high-fire-risk areas, they would be filled by pumping water from the existing municipal system, and the stored water would then be isolated from the drinking water supply and kept for an emergency. In the event of a fire, water would flow down out of the tanks by gravity.

What is a temporary water storage tank?

Temporary water storage tanks. Inflatable Tanks are used for temporary storage of bulk liquids, recovered oils, fuels and potable (drinking) water, emergency water. Inflatable Water Tank.

Where can I buy a liquid storage tank?

Pillow Tanks and Bladder Style Collapsible Liquid Storage Tanks Available @ Interstate Products, Inc. IPI is your go-to supplier of turnkey solutions for water and fuel storage. From inflatables to pillow tanks, our range covers online sizes from 250 gallons up to 25K - or contact us for even larger up to the standard 210,00 gallon tanks!.

What is an oil spill storage tank?

The storage tank is an important part of the oil spill response process. Inflatable Water Tanks are used for temporary storage of bulk liquids, recovered oils, fuels and potable (drinking) water, emergency water,

rainwater, raw water. We offer a range of tank, with storage capacities from 5-50 m3.

Could balloon-like plastic tanks reduce fire risk?

The balloon-like plastic tanks, called Water Trees, were developed by a company as an energy solution. Now the engineer and his colleagues are proposing to install the onion-shaped reservoirs across Southern California as a solution to reduce fire risks.
