

European energy storage demand trend analysis chart

Overview

What is the future of energy storage in Europe?

The European energy storage market contracted in 2019 to 1 GWh, with a cumulative installed base of 3.4 GWh across all segments. However, the future of energy storage in 2020 in Europe remains positive as the energy transition progresses.

Which energy storage technology is the most popular in Europe?

Pumped hydro is the most widely used technology for energy storage in Europe and worldwide, but batteries and hydrogen have come into the spotlight over the last decade as a recent trend in the energy storage market.

What is the European energy storage inventory?

A new interactive platform delivers real-time clean energy storage insights as Europe shifts toward sustainable energy sources. Energy storage helps to balance supply and demand. The European Energy Storage Inventory is the first of its kind at European level to show all forms of clean energy storage solutions.

What percentage of Europe's energy storage capacity is pumped hydro?

However, despite an exponential growth in Europe's battery energy storage capacity, which reached 36 gigawatt-hours in 2023, pumped hydro still accounted for 90 percent of the electricity storage capacity in the European Union that year.

Which country has the largest hydro storage capacity in Europe?

Because of water resources availability and tailored energy policies, Germany, Italy, and Spain accounted for the largest pumped hydro storage capacity in the region, ranging between over nine gigawatts in Germany and 5.6 gigawatts in Spain in 2023. Discover all statistics and data on Energy storage in Europe now on [statista.com](https://www.statista.com)!.

What is the EU energy technology inventory?

The inventory provides policymakers with up-to-date data to shape energy security strategies and the EU's revised Strategic Energy Technology Plan (SET Plan). The inventory also has the potential to feed into the Clean Energy Technology Observatory, ensuring that storage trends are considered in EU-wide energy technology assessments.

European energy storage demand trend analysis chart

[Global Energy Storage Market Records Biggest Jump ...](#)

The global energy storage market almost tripled in 2023, the largest year-on-year gain on record, and that growth is expected to continue.

[Forecasting the Development of Italy's Energy ...](#)

In the first quarter of 2024, the global energy storage market continued to show positive growth trends. Specifically in Europe, Germany, ...

[European Union - World Energy Investment 2025 ...](#)

The European Union also faces the challenge of deeper market integration. Despite significant investment in low-emissions technologies, average energy ...

[World Energy Outlook 2024 - Analysis](#)

The IEA's flagship World Energy Outlook, published every year, is the most authoritative global source of energy analysis and projections. It identifies and explores the biggest trends in ...

[Europe's Latest Energy Storage Detailed Market](#)

In 2023, the energy crisis saw electricity prices soar, driving an explosion in demand for lithium battery energy storage Household energy ...

[Batteries for Stationary Energy Storage 2025-2035: ...](#)

Demand for Li-ion battery storage will continue to increase over the coming decade to facilitate increasing renewable energy penetration and afford ...

[Powering Ahead: 2024 Projections for Growth in the ...](#)

Currently, the domestic energy storage industry in China is rapidly moving towards commercialization, with several local governments ...

[Market Analyses , EASE: Why Energy Storage? , EASE](#)

Market Analyses March 2025 EMMES 9.0 - March 2025 The ninth edition of the European Market Monitor on Energy Storage (EMMES) by the European ...

Europe Energy Storage

Europe Energy Storage - Market Share Analysis, Industry Trends & Statistics, Growth Forecasts (2025 - 2030) - The Europe Energy Storage Market is expected to register a ...

The latest european energy storage electricity price trend chart

Europe's electricity market is characterized by a diverse array of energy sources. The main source of electricity across the continent varies by region, reflecting different geographical and ...

[Energy storage market analysis in 14 European ...](#)

The European Energy Storage Market Monitor (EMMES) updates the analysis of the European energy storage market (including household storage, industrial ...

[Market Analyses , EASE: Why Energy Storage? , EASE](#)

The report reveals the effects of the COVID-19 pandemic on the energy storage market, with lockdown affecting commercial and industrial, and behind-the ...

[TrendForce: Global Installations Outlook for Energy ...](#)

Under the background of energy transition, global energy storage installation is growing vigorously, and many overseas countries and ...

Batteries for Stationary Energy Storage 2025-2035: Markets

Demand for Li-ion battery storage will continue to increase over the coming decade to facilitate increasing renewable energy penetration and afford homeowners with greater energy ...

[european energy storage demand trend analysis chart](#)

The report looks at the electrical energy storage market, providing data and analysis across 3 market segments (residential, commercial & industrial and Front of the Meter) ...

[European energy storage demand analysis chart](#)

expansion of Europe's energy storage installations has slowed, largely attributed to diminished demand. This trend is exemplified by Germany, the continent's premier energy storage market. ...

[european household energy storage demand analysis chart](#)

Sizing of hybrid energy storage through analysis of load profile characteristics: A household ... This is the imbalance that must be dealt with from the electrical circuit outside the household, ...

[Targets 2030 and 2050 Energy Storage](#)

1. Introduction: Why Do We Need Energy Storage Targets? As highlighted in the REPowerEU initiative, the European Commission plans to increase renewables and electrification of the ...

[European energy storage demand trend chart](#)

European energy storage demand trend chart
How much energy storage will Europe have in 2022? Many European energy-storage markets are growing strongly, with 2.8 GW(3.3 GWh) of ...
