

Expected ROI of factory solar storage project in Oman 2025

Overview

With over 3,000 jobs expected and an anticipated boost in non-oil exports via Sohar Port, Oman is positioning itself as a key player in the global green supply chain.

With over 3,000 jobs expected and an anticipated boost in non-oil exports via Sohar Port, Oman is positioning itself as a key player in the global green supply chain.

Muscat: The Ministry of Commerce, Industry and Investment Promotion has revealed that the renewable energy equipment sector—covering solar panels, wind turbines, energy storage, and green hydrogen production tools—is a core focus of Oman’s Industrial Strategy 2040. According to H.E. Dr. Saleh bin.

The sovereign wealth fund of Oman, Oman Investment Authority-backed Future Fund Oman (FFO) has chipped in OMR 60 million (\$156 million) for United Solar Holding, a company that’s building a 100,000-ton polysilicon manufacturing factory in the Middle Eastern country. United Solar is constructing the.

Muscat: Oman has taken a major leap toward expanding its renewable energy landscape with the signing of a \$565 million agreement to establish a state-of-the-art solar manufacturing plant in SOHAR Freezone. Announced during the Advantage Oman Forum in Muscat, the landmark project, facilitated by.

Chinese photovoltaic giant JA Solar is planning an investment to construct a manufacturing facility in Oman’s Sohar Port and Freezone, with an annual production capacity of 6 gigawatts (GW) of solar cells and 3 GW of modules, according to sources. This project marks a further expansion of Chinese.

According to Dr Al Hinai, six major renewable projects are planned for 2027, including the Ibri 3 Solar Plant (500) megawatts (MW), Duqm Wind Farm (250 MW), Jaalan Bani Bu Ali Wind Project (100 MW), Dhofar 2 Wind Farm (120 MW), Sadah Wind Project (90 MW), and Mahout 1 Wind Project (300-400 MW). By.

With a total investment of USD 565 million and covering an area of 32.5

hectares in the second phase of the Freezone, the project is set to deliver an annual production capacity of 6 gigawatts of solar cells and 3 gigawatts of solar modules. Operations are expected to commence in Q1 2026. The.
