

# **Expected ROI of off grid solar storage project in Finland 2025**

## Overview

---

Should off-grid energy projects and power infrastructure expansions be supported by finplan?

The paper recommends the adoption of the FINPLAN tool for appraising off-grid energy projects and power infrastructure expansions. Off-grid energy projects particularly solar mini-grids, play a crucial role in electrifying remote areas with limited access to centralized grids.

What is the growth rate of PV installations in Finland?

Nevertheless, there has still been significant growth in Finland for both industrial and household PV installations. In 2022, the installed capacity of mostly small-scale grid-connected PV installations increased to 395 MW from 288 MW in the previous year, yielding an annual growth rate of 37 % .

How does the Finnish TSO respond to the growing number of renewable installations?

The Finnish TSO, Fingrid, is continuously taking measures to respond to the fast-growing number of renewable installations. The power system is getting more complicated both from a technical and commercial perspective, with many large changes occurring simultaneously both in electricity production and consumption.
